and prevent clots. Drugs names: Aspirin, Coumadin, Cardiac glycoside — These drugs help increase the contraction of the heart. Drug names: Digoxin,

Diuretics, there are many drugs not listed here, and they work in more than one category, but these are some of drugs commonly used by post-cardiac patients at least a while during recovery. As you get and increase your exercise capacity, your doctor will be able to decrease the use of some of these drugs.

Invitational

"We did some good things today, but we just couldn't generate a total team score like we needed to," Howard said.

The Cougars will have a couple of weeks to try to pull things together before their next tournament at the Kansas Women's Invitational in October 21-22.
